

Group 1 / Team Pizza

Lilla Stidam, Parris Oliver, Gema Paz Barcenas

The purpose of the system is to have an easy-to-use, online ordering app. The user will be able to order pizza and other food items and submit online orders.

We've created a Django and Python system allowing users to order pizzas online. It's currently deployed to PythonAnywhere. Users can place an order for pizza, but there's only one size available. The system collects information from the user when they place an order and includes a PayPal button to submit payment. A user can create an account or sign in to an existing account. If the user is signed into their account, their email address will automatically populate on the order form.

Sample Output

Pick items

☒ Cheesy Pizza **10.99**

A classic pizza topped with tomato sauce and melted mozzarella cheese. This is a great option for those who enjoy a simple, yet delicious pizza.

☐ The Sinner **12.99**

This pizza is not for the faint of heart! Topped with spicy jalapenos and sweet pineapple, it offers a unique combination of flavors that will leave your taste buds dancing.

☐ Pepperoni Delight **11.99**

Another classic pizza that is always a crowd-pleaser. Loaded with savory pepperoni slices, this pizza is perfect for meat-lovers.

☐ Vegan Fruity Pizza **14.99**

A delicious pizza for those who prefer a plant-based diet. Topped with a variety of fresh fruits and a creamy vegan cheese, it's a healthy and tasty option.
